

The impact of donations

to THE 11 DAY POWER PLAY
on Roswell Park Comprehensive Cancer Center

The 11 Day Power Play community is saving lives and supporting cutting-edge cancer research at Roswell Park Comprehensive Cancer Center.

The 11 Day Power Play Team Science Award

In 2024, the 11 Day Power Play Team Science Award granted its inaugural \$1 million gift to a team of Roswell Park researchers. This new award will bring together researchers and scientists from different departments at Roswell Park to study new ways to treat, diagnose and even cure cancer.

The first recipient is a team led by Dr. Brian Betts to investigate targeting CD83 to treat acute myeloid leukemia.

Scientific Advisory Committee (SAC)

Launching new research projects

Many of the world-class scientists at Roswell Park have new research ideas that could change the course of cancer treatment and lead to cancer cures. But without funding from community support like The 11 Day Power Play, their ideas will never get off the ground.

Here are the most recent projects funded by this community through Roswell Park's Scientific Advisory Committee:

- **UNDERSTANDING SMALL CELL BLADDER CANCER**

Led by Qiang John Li, MD, PhD to better understand the origin of small cell bladder cancer to find out how it differs from conventional bladder cancer with the ultimate goal of finding novel treatments for this devastating disease.

- **ANTI-SURVIVIN CAR T-CELL THERAPY IN PEDIATRIC SOLID TUMORS**

Led by Priyanka Nanjireddy, MD to study how CAR T-cell therapy can radically change the therapeutic landscape for pediatric solid tumors.

The **impact** of donations TO THE 11 DAY POWER PLAY

The 11 Day Power Play Immunotherapy Labs

Harnessing the power of the immune system to fight cancer

Clinical trials are at the heart of Roswell Park's mission. The comprehensive cancer center is uniquely positioned to conduct early entry phase 1 and phase 2 immunotherapy clinical trials and bring innovative therapies from the lab to patients without barriers or limitations.

In The 11 Day Power Play Immunotherapy Labs, scientists conduct critical research to develop new, promising immunotherapy treatments for cancer patients everywhere.

Igniting Cancer Breakthroughs

Investing in Roswell Park's cell therapy

Your support is helping position Roswell Park as a leader in cellular therapies, an innovative treatment for patients with all kinds of cancer. Roswell Park has assembled a team of industry leaders to execute the innovative work in cell therapy and immunotherapy to ensure your contributions are making the maximum impact for our patients and the future of cancer care.

The 11 Day Power Play Cancer Resource Center

Treating the whole person

Going through cancer treatment can be one of the toughest times in patients' and their loved ones' lives. The 11 Day Power Play Cancer Resource Center, which opened in September 2022 at Roswell Park, eases some of the stressors faced. In the center, visitors feel the warmth and knowledge of compassionate staff and volunteers and patients and their families can find information, support, comfort and connection.
